

Guru99 Banking Automation Framework

TEST ANALYSIS REPORT

A comprehensive analysis of the automated functional testing of the Guru99 Banking Application using Selenium WebDriver and TestNG — validating Login, Customer Management, Account Management, and End-to-End Banking Workflow with a **100% pass rate** across all 7 test cases.

Project Information

The framework is built on a modern automation stack designed for reliability, scalability, and seamless CI/CD integration.

Automation Tool

Selenium WebDriver

Language

Java

Test Framework

TestNG

Build Tool

Maven

Design Pattern

Page Object Model (POM)

Reporting

Extent Reports

CI/CD

Jenkins

Containerization

Docker

Browser

Chrome

Environment

QA

GitHub Repository: https://github.com/Saurabhshbm/Capstone_Project_Guru99.git

Project Objective

To automate the functional testing of the Guru99 Banking Application using **Selenium WebDriver** and **TestNG**. The framework validates Login, Customer Management, Account Management, and End-to-End Banking Workflow.

Login Module

Valid, invalid, and empty login validation scenarios

Customer Management

Customer creation with multiple datasets

Account Management

Account creation verification

Banking Workflow

Deposit, Withdrawal, Fund Transfer, and Logout

Test Execution Summary

7

Total Test Cases

Executed across all modules

7

Passed

All tests completed successfully

0

Failed

No failures recorded

0

Skipped

No tests skipped

Pass Percentage

Perfect execution across the entire test suite

Module-wise Execution Status

All four modules of the Guru99 Banking Application were tested and validated successfully, with every test case passing without failures or skips.

Execution Results

01

Login Module

3 / 3 Passed

02

Customer Module

2 / 2 Passed

03

Account Module

1 / 1 Passed

04

Banking Workflow Module

1 / 1 Passed

Functional Test Scenarios

The test suite covers critical banking functionalities across four modules, ensuring comprehensive validation of user-facing operations.

Login Module

- Valid Login Verification
- Invalid Login Verification
- Empty Login Validation

Customer Module

- Customer Creation Dataset 1
- Customer Creation Dataset 2

Account Module

- Account Creation Verification

Banking Workflow Module

- Complete End-to-End Banking Workflow Validation
- Deposit & Withdrawal
- Logout Verification

Test Coverage Analysis

Cross-Browser Status

Chrome Browser

Executed Successfully
— Primary test execution browser

Edge & Firefox

Configuration
Available and Ready —
Supports browser selection through configuration file

Cross-Browser Testing coverage is at 50% —
Edge and Firefox configurations are ready but not yet executed in this run.

Extent Report Analysis

The Extent Report dashboard provides a comprehensive overview of execution results, presenting test start/end times, execution duration, graphical statistics, execution timeline, and environment information.

Key Findings

- All 7 automated test cases executed successfully with a **100% pass rate**
- No failed or skipped tests recorded
- Detailed breakdown covering Valid/Invalid Login, Customer Creation (multiple datasets), Account Creation, and End-to-End Banking Workflow
- **CompleteBankingWorkflow** consumed the highest execution time — validates the entire business process from login to logout
- Environment details captured: Project Name, Browser, Environment, Framework, CI/CD Tool, Containerization Platform, OS, and Java Version

Extent Report — Screenshots

The following screenshots illustrate the Extent Report's detailed execution insights, graphical test statistics, and execution timelines.

- ✔ The Extent Report serves as an effective reporting and monitoring tool — providing detailed execution insights, graphical test statistics, environment information, and execution timelines. The successful completion of all automated test cases demonstrates the **stability, reliability, and correctness** of the Guru99 Banking Automation Framework.

TestNG Report Analysis

The TestNG Report confirms stable execution with all 7 test methods passing — 0 failures, 0 skipped, and 0 retries.

Report Highlights

- All 7 test methods executed with **green pass status**
- **TestNG DataProvider** enabled Customer Creation validation with multiple datasets, ensuring broader test coverage
- Structured view of executed test classes and methods for easy tracking
- Confirms Selenium WebDriver, TestNG, and Page Object Model implementation are functioning correctly

The report validates the **stability, reliability, and functional correctness** of the Guru99 Banking Application within the scope of the implemented test suite.

Login Tests

Valid, Invalid & Empty Login — All Passed

Customer Tests

2 Datasets via DataProvider — All Passed

Account Tests

Account Creation — Passed

Workflow Tests

Deposit, Withdrawal, Transfer & Logout — Passed
